## LG Sonic 360 SOLAR

Automatic antifouling wiper ensures optimal readings.

With 3x 200WP solar cells and a monitor range of 500m, these units are perfect for larger bodies of water. Three transmitters assure a complete sound coverage of 360 degrees.

### Advanced solar-powered algae control

- Effective algae control on large water surfaces
- Chameleon Technology™ to change the ultrasonic program according to the type of algae
- Operates on solar energy, all year round
- Integrated Aquawiper™ for minimal maintenance

### Overview

Applicable for use on natural or recreational lakes, reservoirs and large irrigation dams.

### 360 Solar Unit

The 360 Solar Unit comes with 3x 200WP solar panels that provide power to the three transmitters. This unit ensures a complete coverage of 360 degrees with a 500m diameter range.

Ultrasonic programs can be changed, based on the algae type. The 360 Solar Unit also comes with an automatic antifouling wiper, ensuring optimal efficiency at all times.
